

# fryer cleaner

## in granular form

**GASTROFRIT®** 

item number : 715029

### key data

- carton: 20 x 150g (portioned)
- content: Ingredients according to VO No. : 648/2004 / EG:  
15-30% phosphates

### Fryer cleaner as granules

Together with a partner, we have developed a novel cleaning granulate especially for fryers. This solution dissolves coarse residues and baked breadcrumbs on the heating and pan wall without mechanical cleaning with warm water.

### BENEFITS

Self-cleaning compact granules for commercial stainless steel fryers. Fryer Cleaner Granules removes dark encrustations on the inside wall, heating element and wire baskets by briefly boiling with water. Especially protein-containing and burnt-in breadcrumbs quickly cause strong encrustations, which lead to increased energy consumption and give the fryer an unappetizing appearance. The regular treatment with fryer cleaner removes the pads quickly and effortlessly. The result is a radiantly clean, hygienically cleaned fryer with a new look. The cleaned fryer heats up faster and uses less energy.

The best result with strong incrustation can be achieved with the following procedure.

- Drain frying oil
- Fill fryer with water
- Heat water to 90 degrees
- Empty the Gastrofrit cleaner (portion) into it
- Stir until granules have dissolved
- Let it simmer for at least 15 minutes. Let it boil for a longer time if it is heavily soiled
- Drain solution and release
- Rinse
- Allow to dry thoroughly

### HINTS

Do not use for household aluminum fryers / For professional use only / Contains sodium hydroxide / R35 causes severe burns / R37 Irritating to respiratory system / S1 / 2 Keep locked up and out of the reach of children / S22 Do not breathe dust / S23 If touched by eye Rinse immediately with plenty of water and seek medical advice / S25 / 3 7/39 Wear suitable protective clothing when working / S45 In case of accident or if you feel unwell, seek medical advice immediately
